	<p><b>Artificial intelligence in STEM education: the paradigmatic shifts in research, education and technology</b> by Ouyan, Fan</p> <p><b>CRC Press 2023</b> Acc. No.: 52657 Call No.: 006.3 ISBN: 9781032009216</p> <p><b>Summary:</b> Artificial intelligence (AI) opens new opportunities for science, technology, engineering and mathematics (STEM) education. AI in education (AIED) has undergone several research, practice, and technological paradigmatic shifts in its brief history, which can be particularly observed in STEM education. The development of AI in STEM education has experienced significant shifting of the focuses during the last decade. In general, it has been reshaped to gradually emphasize the learner-centered, while weakening the teacher-directed instruction mode. This has led to a change between the three paradigms: learner-receiver, learner-partner, learner-leader. Consequently, supporting AI frameworks have been significantly improved from intelligent tutoring systems (ITSs), exploratory learning environments (ELEs) to human-centered participatory (HCP) smart education. This book aims to track the paradigmatic shifts of AI in STEM education and intends to highlight the reasons behind these changes as well as explain.</p>

## Clear thinking: turning ordinary moments into extraordinary results by Parrish, Shane

Cornerstone Press 2023

Acc. No.: 52676 Call No.: 153.4 ISBN: 9781529915952

**Summary:** Few things will change your trajectory in life or business as much as learning to make effective decisions. Yet few of us recognize opportunities to decide in the first place. The moments that matter do not always announce themselves. No one pulls you aside and says, slow down and think, you are about to do something stupid. And yet the decisions we make in these moments move us closer or further away from the results we ultimately seek--love, belonging, success, wealth. According to Farnam Street founder Shane Parrish, we must get better at recognizing these moments and using them to achieve the life we want. Clear Thinking gives you the tools to identify these moments and reshape how you navigate the critical space between stimulus and response. As Parrish shows, we may imagine we are the protagonists in the story of our lives. But the sad truth is, most of us run on autopilot. Our behavioural defaults, groomed by biology, evolution, and culture, are primed to run the show for us if we don't inter.

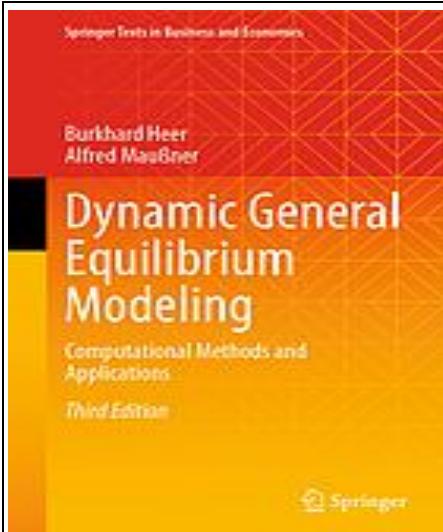

**Introduction to safety science: people, organisations and systems by O'Hare, David**

**CRC Press 2022**

**Acc. No.: 52651 Call No.: 328.408 ISBN: 9781032231969**

**Summary:** The book is designed as an accessible and readable introduction to a rapidly expanding area that is in demand worldwide. A variety of professionals from different backgrounds are being tasked with managing health and safety risks in a wide variety of settings. Many lack current and up-to-date knowledge of the key developments that have taken place in Safety Science in recent decades, as well as a sense of how these developments fit in with previous approaches. This book takes readers on a 'journey' across three broad developments in safety science. It covers topics that focus on the individual including human error, risk and the role of cognition in human performance. It then shifts to research in safety science that uses organizations as the basic unit of analysis, questions about organizational decision making and the characteristics that dispose towards or against organizational failure and it introduces perspectives based on systems science that address issues that arise out of complexity and interdependence.

**The message by Coates, Ta-Nehisi**

**Hamish Hamilton 2024**

**Acc. No.: 52678 Call No.: 651.5042 ISBN: 9780241724194**

**Summary:** In his keenly anticipated new book, The Message, he explores the urgent question of how our stories - our reporting, imaginative narratives and mythmaking - both expose and distort our realities. Travelling to three resonant sites of conflict, he illuminates how the stories we tell - as well as the ones we don't - work to shape us. The first of the book's three main parts finds Coates on his inaugural trip to Africa - a journey to Dakar, where he finds himself in two places at once: a modern city in Senegal and the ghost-haunted country of his imagination. He then takes readers along with him to Columbia, South Carolina, where he reports on the banning of his own work and the deep roots of a false and fiercely protected American mythology - visibly on display in this capital of the confederacy, with statues of segregationists still looming over its public squares. Finally, in Palestine, Coates sees with devastating clarity the tragedy that grows in the clash between the stories we tell and reality on the ground. Written at a dramatic moment in American and global life, this work from one of the country's most important writers is about the urgent need to untangle ourselves from the destructive myths that shape our world - and our own souls - and embrace the liberating power of even the most difficult truths.

**Future ready: the four pathways to capturing digital value by Woerner, Stephanie L**

**Harvard Business Review Press 2022**

**Acc. No.: 52683 Call No.: 658.406 ISBN: 9781647823498**

**Summary:** As the world continues to become more fully digitized, it seems like almost every company you can think of-including your own-has embarked on a "digital transformation" journey. The problem is, many companies start down the road without a good sense of where they are going or a clear idea of how they will create and capture digital value. Not surprisingly, this leads to problems: failure to realize the value from digital in their bottom lines, wasted resources and effort, added complexity and dysfunction. This compact, no-nonsense book provides a solution. In their years of working with senior executives around the world, MIT research scientists Stephanie Woerner, Peter Weill, and Ina Sebastian noticed that these leaders knew they had to transform their businesses, but lacked a coherent framework and a common language-a playbook-to guide and motivate their employees and keep everyone focused on a common goal. Future Ready is that playbook. Based on years of rigorous research with data from more than a thousand companies-BBVA, CEMEX, DBS, Fidelity, Maersk, and many others-the book provides a powerful, field-tested "four pathways" framework that offers insights into the important dimensions at which a firm must excel in order to be competitive, as well as the organizational disruptions that every firm must manage as part of the transformation journey.

**Land between the rivers: a 5000-year history of Iraq by Bull, Bartle**

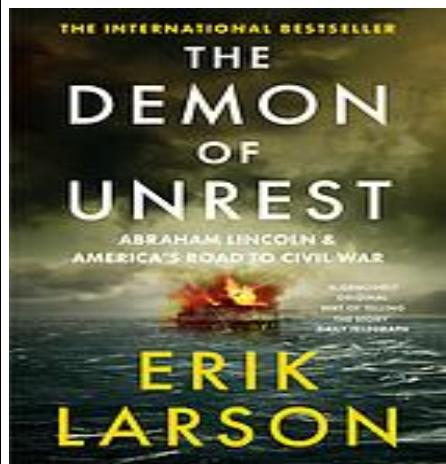

**Atlantic Books 2025**

**Acc. No.: 52682 Call No.: 956.7 ISBN: 9781838957872**

**Summary:** Iraq is where civilisation was born, where East and West have mixed and clashed since long before Alexander, and it was here by the waters of Babylon where Judaism was born and the Sunni-Shia schism took its bloody shape. Inspired by extensive reporting from the region and a decade delving deep into its history, *Land Between the Rivers* chronicles Iraq's uniquely central role on the global stage throughout the past five millennia.

We begin the story with ancient Sumer and Gilgamesh building the walls of Uruk ('Iraq') to make a great name for himself at the edge of historical time. We end it in 1958, as the last royal family of Iraq is slaughtered on the steps of a small palace in Baghdad, the most effervescent, free and promising capital in the Middle East.

Bartle Bull's remarkable, sweeping achievement reminds us that the region defined by the land between the rivers has, throughout history, played host to the contest pitting humanism against the machinations of power and fate.
