

## Net Zero Emissions Commitment

Institute of Management Technology Ghaziabad is committed to achieving **Net Zero Greenhouse Gas Emissions by 2039**, aligning with global climate goals and the United Nations Sustainable Development Goals. Building on its ongoing carbon audit initiatives, the Institute adopts a comprehensive approach covering **Scope 1, Scope 2, and Scope 3 emissions**, with a baseline year of 2025 and an interim target of 50% emission reduction by 2032. This commitment will be realized through renewable energy adoption, energy efficiency, sustainable campus operations, and responsible resource management, supported by robust governance mechanisms and periodic third-party assessments. By integrating sustainability into its academic curriculum, including its Social Responsibility (SSR) initiatives, IMT Ghaziabad aims to cultivate responsible leaders while advancing its vision of becoming a carbon-responsible institution.
