

ENHANCING SUPPLY CHAIN PERFORMANCE

DURATION: 2.5 DAYS

PROGRAM CONTEXT

In the globalized of the economy, product life cycles have shortened and customers are looking for variety in small-lot deliveries at ever-shortening lead times. Recent pandemic and resultant lockdowns across countries in intermittent phases has exposed the importance of a robust supply chain. Faster means of communication and the internet have added to the complexities of the business environment. It has become necessary as well as possible to strive for exploiting the full potential of the opportunities that a company's supply chain offers.

PROGRAM OBJECTIVES

The program is intended to strengthen the participants' abilities of working in a cross functional environment in a highly competitive and complex organisational set up.

The participants will get an opportunity to revisit and refresh SCM fundamentals, frameworks and tools so as to enhance their competence for using these in their respective organisations. This will also be a unique opportunity for the professionals and academicians of repute and fellow participants from other organisations.

- Understanding strategic role of the supply chain
- Understand drivers of supply chain performance
- Understand challenges of managing supply chain in India
- Developing capabilities for analytical analysis of supply chains

LEARNING OBJECTIVES
